## In the claims:

Please cancel claims 5, 24, and 35 without disclaimer or prejudice to applicants' right to pursue the subject matter of these claims in a future continuation or divisional application.

Please add new claims 83-110 as follows:

- (New) The method of claim 42, wherein the subject is a human being.--
  - --84. (New) The method of claim 42, wherein the agent is an activated nucleophile, and is further characterized by the presence within the agent of an electrophile and chirality complementary to a bacterial cell wall depsipeptide.--
    - --85. (New) The method of claim 42, wherein the agent is represented by the formula S-Pro-Cn.--
    - --86. (New) The method of claim 42, wherein the agent has the structure:  $\begin{array}{c} OH \\ O \\ N \end{array}$

wherein n is an integer from 1 to 6 inclusive and R is hydrogen or a  $C_1$  to  $C_6$  straight chain or branched alkyl group.--

-, )

- --87. (New) The method of claim 42, where the agent catalytically cleaves said ester bond.--
- --88. (New) The method of claim 42, wherein said ester bond is present in the structure D-Ala-D-Lac.--

Applicants: Gabriela Chiosis et al.

--89. (New) The method of claim 42, wherein the agent is administered prior to administering the glycopeptide antibiotic.--

- --90. (New) The method of claim 89, wherein the agent is administered a sufficient period of time prior to administering the glycopeptide antibiotic to permit cleavage of said ester bond to be effected.--
- --91. (New) The method of claim 42, wherein the agent and the glycopeptide antibiotic are administered simultaneously.--
- --92. (New) The method of claim 91, wherein the agent is covalently attached to the glycopeptide antibiotic.--
- --93. (New) The method of claim 42, wherein the bacteria are <u>Staphylococcus</u> bacteria.--
- --94. (New) The method of claim 93, wherein the bacteria are S. aureus bacteria.--
- --95. (New) The method of claim 42%, wherein the bacteria are Enterococcus bacteria.--
- --96. (New) The method of claim 42, wherein the bacteria are Streptococcus bacteria.--
- --97. (New) The method of claim 42, wherein the bacteria are Leuconostoc bacteria.--

--98. (New) The method of claim 42, wherein the bacteria are <u>Pediococcus</u> bacteria.--

--99. (New) The method of claim 42/ wherein the bacteria are Lactobacillus bacteria.--

--100. (New) The method of claim 42, wherein the bacteria are <u>Erysipelothrix</u> bacteria.--

--101. (New) The method of claim 61, wherein the agent is an activated nucleophile, and is further characterized by the presence within the agent of an electrophile and chirality complementary to a bacterial cell wall depsipeptide.--

--102. (New) The method of claim 61, wherein the agent is represented by the formula S-Pro-Cn.--

--103. (New) The method of claim 61, wherein the agent has the structure:

erein n is an integer from 1

wherein n is an integer from 1 to 6 inclusive and R is hydrogen or a  $C_1$  to  $C_6$  straight chain or branched alkyl group.--

--104. (New) The method of claim 61, where the agent catalytically cleaves said ester bond.--
